

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Baseline — annealed

Baseline — quenched

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Gamma(shape=0.5) — annealed****Gamma(shape=0.5) — quenched**

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Gamma(shape=1) — annealed****Gamma(shape=1) — quenched**

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Gamma(shape=2) — annealed****Gamma(shape=2) — quenched**

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Exponential — annealed

Exponential — quenched

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Lognormal($\sigma=0.5$) — annealed****Lognormal($\sigma=0.5$) — quenched**

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Lognormal($\sigma=1$) — annealed

Lognormal($\sigma=1$) — quenched

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Pareto($\alpha=2$) — annealed

Pareto($\alpha=2$) — quenched

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Pareto($\alpha=3$) — annealed

Pareto($\alpha=3$) — quenched

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Uniform(a=0.7) — annealed

Uniform(a=0.7) — quenched

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Beta(a=0.5) — annealed****Beta(a=0.5) — quenched**

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Weibull(shape=0.7) — annealed****Weibull(shape=0.7) — quenched**

● Estimate ± 1.96 SE

— Fitted $a + b \log L$

- - Fitted $a + b(\log L)^2$

Inverse gamma($\alpha=2.2$) — annealed

Inverse gamma($\alpha=2.2$) — quenched

● Estimate ± 1.96 SE — Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$

Bernoulli(a=0.8) — annealed

Bernoulli(a=0.8) — quenched

● Estimate ± 1.96 SE— Fitted $a + b \log L$ - - Fitted $a + b(\log L)^2$ **Triangular(a=0.8) — annealed****Triangular(a=0.8) — quenched**
